

Our Story

Since our start in 1993, Varsal has developed into a global technically focused manufacturer of specialty chemicals. Headquartered in Warminster, PA, Varsal has an ISO-9000 and GMP-compliant chemical manufacturing center and research / QC laboratory in Tangshan, China.

Custom Manufacturing Capabilities

Varsal offers custom synthesis as well as custom blending and mixing. Our capabilities include:

- Crystallization-induced asymmetric transformation for chiral compounds
- Highly selective halogenation (F, Cl, Br, I) of diols
- Synthesis of alkynyl alcohols
- Synthesis of disulfide compounds
- Custom inspection and packaging
- Customized specifications

The Varsal Advantage

Through our capabilities and experience (~70 patents), we can be your integrated supply chain partner by helping you:

- ✓ Optimize asset utilization
- ✓ Focus on strategic core competencies
- ✓ Reduce raw material costs
- ✓ Solve your logistics and raw material procurement challenges
- ✓ Solve technical issues

Available Equipment

- 50 L to 5,000 L
 - Glass/SS/Ti-lined reactors
 - Pressure up to 150 atm
 - Temperature for -40°C to 350°C
- Chiller/Centrifuge/Dryer
- Distillation tower
- Fermentation equipment
